Apr 2024 - Aug 2024  
Warsaw

- Fast and effective troubleshooting of technical issues reported by users.
- Software configuration.
- Installing and updating systems and applications.
- Supporting users with software and computer hardware-related issues.

### PROJECTS

#### ITOTYLE

[Vue3](#) | [Typescript](#) | [TailwindCSS](#) | [Node](#)  
<https://www.itotyle.pl/>

A platform for monitoring job offers in the IT and technology sector, designed to simplify the job search process. The platform aggregates job postings in one place, providing candidates with comprehensive insights into the job market. The project is educational and non-commercial, focusing on adapting features to meet user needs.

#### EXTREMETOOLS B2B

[Vue3](#) | [Pinia](#) | [Javascript](#) | [Laravel](#)  
<https://github.com/gbura/extreme-tools-online-shop>

Online tool shop, which offers a catalog of over 4,000 products, consists of two main sections: the customer-facing site and the admin panel. The entire store is built on the integration between the frontend and a Laravel-based backend API. The graphic design was provided by our client.

#### COUNTRIES REST-API

[Vue3](#) | [Typescript](#) | [TailwindCSS](#)  
<https://github.com/gbura/countries-rest-api>

Fully responsive application that allows users to explore general information about any country in the world. Users can check details such as population, currency, borders, and flags. The app features a light mode and dark mode toggle for a personalized user experience.
